

# GS.conf

Adding new maps and dungeons requires editing in this section.

This is the world information for Gaap as an example:

```
#-----  
[World_gs01]  
index      = 1  
tag        = 1  
cid        = 0,2,13  
base_path  = x1/  
max_sight_range = 50  
max_flight_height = 330  
grid        = {125,125,20.5,-1280.5,-1280.5}  
local_region = {-1024,-1024.0} , {1024.0,1024.0}  
limit      = allow-root;  
player_capacity = 4096  
  
[Terrain_gs01]  
szMapPath  = map  
nAreaWidth = 512  
nAreaHeight = 512  
nNumAreas  = 4  
nNumCols   = 2  
nNumRows   = 2  
vGridSize  = 2.0f  
vHeightMin = 0.0f  
vHeightMax = 800.0f  
#-----
```

Index, Tag and Base\_Path are the key identifiers to link it to Gaap files.

Base\_path = x1 directory folder in configs.
